DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-19 and 25-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Call.

Call shows, figure 1, methods and apparatus for disseminating product information via the Internet. The product code translator 101 is the common module, which is used by and available for the manufacturers' Internet sites (supplier's web site, see column 1, line 64) and online resellers (reseller's website, column 1, line 57). There is a registration handler process, which allows access to the product translator. One method is user certificates (with related address). Similar password, certificate or digital signature protection schemes may be used to provide access to certain data (sets of information) or to data in certain forms only to authorized requesters (sets of related addresses). Online supplier and resellers inherently have payment engine functions. Since they are both selling the products in the product translator, they still use the information in the translator.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Salzberg et al. and Peyrelevade et al. show systems of interest.
